Investment Objective

The Balkerne Asset Management AIM IHT Service is a discretionary managed portfolio of 20 to 40 holdings and has the Investment Objective of capital appreciation with a **Higher Risk Profile**.

Suitability

This portfolio should be viewed as a long-term investment and is suited to clients whose aim is to shelter their capital from Inheritance Tax. In the short term the extent and style of exposure to the Alternative Investment Market (AIM) could produce considerable fluctuations in the value of their investment. Clients must understand that this strategy is a much higher risk than other strategies in the expectation of more tax efficient rewards, which even then may not occur due to factors such as adverse market conditions. Portfolios may be unbalanced and opportunistic in nature. Investors should be aware that the value of their investments, and the income from them, may rise and fall throughout the term of the investment and returns are not guaranteed.

Investment Policy

To achieve the objective by investing in qualifying investments which are those that benefit from Business Property relief (or Business Relief (BPR)) at the time of purchase. We cannot, however, provide any guarantees or assurances that such investments are, or will remain, as qualifying investments.

Valuations & Reporting

Quarterly valuations are issued as at 31 March, 30 June, 30 September and 31 December of each year. Included with the valuation is a schedule of income received for the period.

Balkerne Asset Management AIM IHT	-8.0%	-14.6%	-8.3%	-44.2%	-32.0%

Risks of AIM company shares

Investment in Companies listed on AIM are only suitable for investors whose Attitude to Risk is such that they wish and can afford to be exposed to **HIGH RISK** investments. Investors should only contemplate investing in AIM shares if they can sustain a loss of the capital committed.

Investors should be aware that investment in AIM Companies carries a higher risk than Companies on the main market of the London Stock Exchange.

AIM Companies are subject to lighter regulatory requirements than Companies listed on the London Stock Exchange main market when listing and reporting. It may be difficult to obtain reliable information as to the value and the risks to which the shares are exposed.

Shares in AIM Companies may be difficult to sell and Market Makers may not be prepared to trade in them.

Investment in AIM Companies should be considered as a long-term investment i.e. at least 5 years.

Share price volatility can typically be greater in Smaller Companies and the volatility of the AIM Market is higher than the London Stock Exchange main market.

Company Profile

At Balkerne Asset Management we have always held the belief that managing client monies is a privilege and not a right and it is this ethos which underpins the day to day management and processes within the organisation.

Established since the early 1980's, Balkerne Asset Management has built a strong tradition for offering both bespoke and model Discretionary Portfolio Management services, tailored to the objectives and risk profile of their clients. With a team of experienced and knowledgeable individuals within the investment and financial services professions, Balkerne Asset Management are well positioned to manage a broad range of investment portfolios inclusive of a diverse spread of assets across all market and geographic sectors.

Detailed attention to the daily management of portfolios is a critical aspect of the firm's process and has helped earn Balkerne Asset Management a respected reputation for providing a unique approach to discretionary portfolio management for discerning clients.
